

Field Technician

Intelligent Wellhead Systems (IWS) is currently seeking a Field Technician to join our team in Midland and Odessa, TX. IWS is a privately owned technology company backed by Pason Systems that specializes in the development and deployment of proprietary well control systems. Through extensive R&D efforts, IWS has developed the inVision product lines. IWS innovation is the result of our team of multi-disciplined engineers, pressure control experts, software developers, and partnerships with leading energy companies. The Field Technician role is critical to IWS success, providing onsite equipment installation, training, and troubleshooting IWS control and data systems.

Primary Responsibilities

- Interact with customers daily through in-person, verbal and written interactions, written reports, and basic field interaction.
- Installation and setup of electrical hardware, mechanical hardware, and software on customer locations.
- Configure network devices related to the inVision systems/components with training.
- Train customers and/or third-party service companies' personnel to use IWS equipment.
- Generating field reports, data gathering and performing light data analysis
- Maintenance, troubleshooting, and repair of all electronic, electrical, and computer-based equipment with training.
- Rig-up/Rig-out equipment, inspection, maintenance, and organization of differing types of equipment.
- Hands on and remote field support of customers and third-party services on customer sites.
- Work independently to self dispatch to remote locations.

Core Competencies

- Successful Field Technicians are fast learners, self-motivated and independent workers.
- Strong computer skills with familiarity using Microsoft based products. IWS will train the successful candidates to interface and network corresponding proprietary hardware and software systems.
- Experience in field-based operations, general maintenance tasks, wellsite knowledge/awareness
- Ability to adapt to a changing work environment and/or priorities of work assignments.
- Capacity to provide detailed and complete reports in an efficient manner.
- Strong communication and social skills.

Qualifications & Experience

- Minimum 2 years experience in an oil & gas well completion related service line.
- Effective oral and written communication skills.
- An interest in current/emerging technologies that will help achieving organisational targets.
- Knowledge and experience around computer/related hardware.
- Ability to work away from home considered an asset.

Job Type: Full-time

Salary: \$90,000.00 - \$100,000.00 per year

COVID-19 considerations:

All staff are required to carry out work in accordance with appropriate COVID-19 and health and safety work practices and procedures.
